

Rahul Kumar

Software Engineer | DevOps & Cloud Infrastructure Focus

Noida, Uttar Pradesh, India | Open to Relocation | +91-6299566895 | mrahul2572002@gmail.com | linkedin.com/in/rahulkr0407

PROFESSIONAL SUMMARY

Software Engineer with experience at Tata Consultancy Services, working on enterprise applications, REST API integration, production troubleshooting, Git-based collaboration, and Angular/TypeScript. Building full-stack and cloud-deployed applications with Python/FastAPI, MongoDB, Docker, authentication, AI integrations, and automated deployments. Developing toward DevOps and cloud infrastructure roles with a focus on automation, CI/CD, containers, reliability, and secure cloud operations.

TECHNICAL SKILLS

Languages	Python, JavaScript, TypeScript, C++, C, Java
Frontend	Angular 20, React, HTML5, CSS, Tailwind CSS, RxJS
Backend & APIs	FastAPI, REST APIs, Pydantic, Node.js, JSON, Swagger/OpenAPI
Database	MongoDB, MongoDB Atlas, SQL, MySQL
Cloud / DevOps	Docker, Git/GitHub, automated deployments, Vercel, Render, CI/CD concepts
Security	JWT, OAuth 2.0 / Google Sign-In, Argon2, SHA-256, JWKS verification
Testing & Tools	Jasmine/Karma, VS Code, npm
AI	Google Gemini, prompt engineering, structured JSON output, AI response verification

WORK EXPERIENCE

Systems Engineer — Tata Consultancy Services (TCS), Noida | 04/2025 – Present

- Develop and maintain enterprise application features using Angular and TypeScript.
- Integrate frontend modules with backend REST APIs and manage API responses, authentication flows, and error handling.
- Debug and resolve production issues, contributing to application stability and reliable releases.
- Use Git for version control and collaborate with backend developers and product teams in an Agile/Scrum environment.

PROJECTS

CivicLens AI — Full-Stack AI Civic Information Platform | In Development | Angular 20, FastAPI, MongoDB, Gemini, Docker

- Building and deploying a full-stack platform that provides neutral, age-appropriate explanations of Indian bills, policies, protests, elections, and civic topics using Angular, FastAPI, MongoDB, and Google Gemini.
- Designed a FastAPI REST API with 18+ endpoints, Pydantic validation, Swagger documentation, secure JWT/OAuth authentication, Argon2 password hashing, rotating refresh tokens, and Google JWKS verification.
- Implemented an AI verification layer that validates generated source URLs against official topic sources, plus retry/backoff and in-memory caching for resilient AI responses.
- Built an Angular 20 SPA with 12+ routed pages, RxJS reactive authentication, token-refresh interceptor, route guards, reusable notifications, dashboards, AI chat, bookmarks, and civic trackers.
- Containerized the application with Docker and deployed the backend on Render, frontend on Vercel, and database on MongoDB Atlas with automatic deployment from GitHub.

Shrtx — Frontend URL Shortener & Analytics Platform | Angular, TypeScript

- Developed a modular URL-shortening and analytics platform using Angular and TypeScript.
- Implemented JWT-based authentication with access/refresh token handling and integrated backend APIs.
- Built analytics dashboards and subscription features with secure API communication and error handling.

EDUCATION

Bachelor of Technology — Computer Science & Engineering | Lovely Professional University | 2020 – 2024

SELECTED DEVOPS-RELEVANT EXPERIENCE

- Git/GitHub-based development and collaborative workflows.
- Docker-based application containerization and cloud deployment experience through CivicLens AI.
- Automated deployment workflow using GitHub-connected deployments to Vercel and Render.
- Production debugging, API troubleshooting, authentication/security implementation, and application reliability work.

Accuracy note: Terraform, Azure/AWS, Kubernetes, and advanced infrastructure monitoring are not claimed as professional production experience unless separately supported by your actual work or projects.
